***Krems's products will be transshipped to barges at Constantza Port.

At discharging ports demurrage for KREMS at the rate of 1,500 EUR per day pro rata to be paid by Buyer.

Dispatch at the discharging ports is half of the demurrage (Demurrage/Half Despatch).

Total discharging time is 5.00 days (WWD & SSHEX) for Krems. If tonnages is increased, total time will be revised according to discharging rates.

Weekends, official and local holidays are not counted, and the countdown starts at 8:00 a.m. on the next business day following the holiday.

If work is carried out on holiday or before the start of the countdown, half of the working time is counted.

The working period is based on SSHEX.

Survey will be carried out by the contractor when unloading of the ship and loading of the barges in Constantza and the survey report will be sent to ETİ MADEN by e-mail

IMPORTANT NOTES:

- Big bags must be stored maximum 6 tiers.

The palletized products should be loaded in 3 tiers.

- All products will be loaded in one of Çelebi Terminal's piers is determined by the Contractor's agency.
- Product types and tonnages could be changed by ETİ within 10% option.
- The products are harmless, non-dangerous and non imo classed.

The holds of vessel must be reinforced with hatch cover marine tape (in min. 150 mm widths and at min. 5 mm thickness) or with foam by the Contractor in order to minimize water leakage.

- Krems's products will be transshipped to barges at Constanta Port.

DETAILS OF VESSEL

- The hatches of holds must be MacGregor type or hydrolic endrolling type automatic hatches.
- The vessel(s) has/have not carried any cargo of waste, derived products of petrol, petroleum and coal products, scrap, derived products of coal, refused-derived fuel (RFD)

or solid recovered fuel and specified recovered fuel (SRF) during the last one year in addition to 2 Nr. Type Specification.

The holds, hatch covers and interior and exterior walls of the holds of the ship(s) must be free of rust and dirt. Hatch covers must be isolated to water leakages.

Shipowner(s) and ship(s) must be a member of IACS

Vessel should not been under detention within a year.

The ship should be suitable for the characteristic and climatic condition of the loading and unloading ports and the ship should be have proper depth holds in order to use crane and its grabber.

The Holds of Ship: The holds of the ship(s) should be double-skinned and box-shaped type and bulk head type. The holds shall have steel floors. The holds should be at the same size with the hatches, in "OPEN HATCH" form, with an automatic opening and closing feature.

DETAILS OF LOADING PORT

All products will be loaded in one of Çelebi Terminal's piers is determined by the Contractor's agency.

Çelebi Terminal:
