COMPREHENSIVE LIST OF GLOBAL COVID TESTING LOCATIONS – DRAFT REVISED DOCUMENT

### Action Required

Members are invited to note an updated spreadsheet attached at Annex 1 reflecting information provided from a number of sources and to see whether there are any testing locations which they know of in their country or which they have used elsewhere which have not yet been provided for inclusion.

Where this is the case **please send details annotated in the spreadsheet annotated in red to** <u>natalie.shaw@ics-shipping.org</u> and these will be added in to the master document.

Information on any country not mentioned would be very helpful but specific countries for which information would be particularly welcomed are as follows:-

Australia	Dubai	Fiji	France
Germany	Greece	Ireland	Italy
Kuwait	Kiribati	New Zealand	Spain

The aim is:

for the list to be updated regularly and also for locations to be eliminated if concerns are expressed regarding the reliability or safety of the tests that have been processed at the respective establishments.

- to post the first mature document up on the ICS website once ready to share
- to update the document on the website with any changes or information provided by countries or companies weekly from then onwards.
- to also note any concerns expressed regarding the testing facilities and where necessary to take them off the list.
- to add references to the list to version 4 of the ICS Covid 19 Medical Guidance to be issued towards the end of this year.
- For any companies wishing to share additional testing information with the network to contact the undersigned at the above email address.

ICS would also be happy to share the name of the information source if desired or alternatively to exclude if preferred.

It is recognised that the advice on testing and availability of tests is constantly changing so ICS will need the assistance of others to advise when changes are known to be able to maintain the document as a valuable tool for the industry.
